PRESS RELEASE

> For Immediate Release

Northfield, N.J. – 10/07/11–Fox Rehabilitation is proud to announce the grand opening of their newest Outpatient Rehabilitation Clinic and celebrate with an open house event on Thursday, October 20th from 4-7 p.m.

Local residents, healthcare professionals, and community leaders are invited to tour the clinic and meet the staff at 331 Tilton Road, Suite 7 in Northfield. Cocktails and hors d'oeuvres will be served throughout the event, which will include a ribbon-cutting ceremony at 4:30 p.m.

Rudy Christopher, III, PT, MPT, Director of Outpatient Operations will kickoff the evening with opening remarks. Rudy rejoins the Fox management team after owning an independent practice for two years. His clinical experience includes working with clients of all ages in various settings – including outpatient clinics, adult medical day cares, and assisted living facilities – for over 11 years in Atlantic and Cape May Counties.

Fox Rehabilitation began providing exceptional physical, occupational, and speech therapy services at the Northfield location on August 1. In keeping with the proactive, evidence-based model of practice, the outpatient clinic is focused on age-specific rehabilitation programs to encourage healthy aging. The clinic is geared towards initiating rehabilitation services sooner in order for a clinician to follow patients through stages of aging while implementing interventions that are effective in decreasing risk of falls and obtaining positive outcomes in dealing with acute or chronic conditions.

Fox Rehabilitation has earned a reputation for excellence as a leader in geriatric therapy services and was recently recognized as one of the top five private practices in the nation in 2011 by *ADVANCE Magazine*. Dr. Tim Fox, Founder and CEO of Fox Rehabilitation, was named the most influential therapist in the nation by *Therapy Times*.

“Healthy aging is a lifestyle,” said Rudy Christopher, Director of Outpatient Operations. “Our goal is to exceed treatment expectations, restore function, and wellness programs for all of our patients that are challenging and empowering all at the same time.”
